

REDUCCIONES
"MUTABLE"

```
String p = Stream.of("b", "c", "a")  
                  .sorted()  
                  .reduce("", String::concat);
```

Problema: poco eficiente

```
Stream<String> stream = Stream.of("a", "b", "c");
```

```
StringBuilder sb = new StringBuilder();  
stream.forEach(s->sb.append(s));
```

```
void forEach(Consumer<? super T> action);
```
